

# Lightweight THL Robots

Toshiba Machine

New to **Toshiba Machine's** (Elk Grove Village, IL) affordable and lightweight THL Series line, the THL300 and THL400 offer increased payload capacities, says the company. With arm lengths of 300 and 400 millimeters respectively, these new THL robots fall into the class of small SCARA robots, while they boast the maximum payload capacity (5 kilograms) in their class. Like all THL Series robots, the newer THLs are equipped with lightweight die cast aluminum arms. The THL's lighter robot can reduce costs for system integrators, as the THL Series requires minimal supporting and vibration-suppression elements.
