

Platinum II Nomad® Lift Trucks

Nissan Forklift Corporation

Nissan Forklift Corporation's (Marengo, IL) Platinum II Nomad® Series lift truck offers the flexibility to use the compact indoor lift truck outdoors as well. Built on a smaller frame, Nissan Forklift's exclusive Nomad Series lift truck rides on solid pneumatic tires, which provide the ability to use the indoor truck outside on improved surfaces. The Nomad Series is powered by Nissan's K21 ultra-low-emission engine and features precise maneuverability, easy operation systems, rugged construction, and excellent overall value, says the company. Nomad lift trucks maintain higher capacity retention than other standard pneumatic tire models their size, making them ideal for handling material between inside operation and outside storage facilities.
