

Laser Align App

LUDECA

LUDECA (Doral, FL) has released a new version of its “Laser Align” mobile application. The app is available in the iTunes Store for both iPhone and iPad, as well as in Google Play for the Android market. The application now has an interactive Tolerance Table, where the user can input his own machine RPM and the app will kick back the respective Alignment Tolerances for both short flex and spacer type couplings, says the company. It also includes a Thermal Growth Calculator and a Soft Foot Assistant to help the user interpret soft foot values.
