

CE Series Compactor Enclosure

Zoneworks

Zoneworks (Milwaukee, WI) has introduced the CE Series Compactor Enclosure, a flexible, custom-designed product that encloses compactors and dumpsters at the loading dock. The Compactor Enclosure improves energy efficiency by helping to maintain consistent temperature and humidity levels inside a facility, while also keeping wind and inclement weather outside for a safe, comfortable environment for employees inside, says the company. The Compactor Enclosure consists of a strong steel framework, Zoneworks' insulated curtain wall panels, and a corrugated steel roof with integral skylight. The insulated panels feature a heavy-duty, multi-layered construction of 18-ounce, industrial vinyl fabric surrounding anti-microbial polyester batting.
