Faster Material Removal

Hutchins Manufacturing Company

The Model 700's 5/16-inch (8 millimeter) offset from **Hutchins Manufacturing Company** (Pasadena, CA) offers 25 percent faster material removal than previous models, says the company, adding that it is the ultimate tool for anyone looking for true sanding speed. Not only is this a 12,000 RPM sander, it has the same comfort and low vibration characteristics as Hutchins' ProFinisher™ Models 500 and 600. No other big-offset sander offers this combination, according to the company. Hutchins Manufacturing is family-owned and operated, manufacturing American made sanders for over 60 years.
