Forklift Broom Attachment

Osborn

Osborn (Cleveland, OH) offers Broomate, an industrial broom attachment for forklift trucks that is designed for a wide variety of commercial and industrial applications. Available in three models: Magamate, Maximate, and Midimate, Broomate provides maximum sweeping power with minimal maintenance, says the company, and the attachments are easy to clean and offer slide-in, slide-out bristle changing. Designed with a 5 millimeter galvanized steel hood and linkages for fork tines, Broomate is an effective tool for sweeping at construction sites, warehouses, factories, recycling depots, and other industrial areas. The brooms are highly versatile and can be used to clear gravel, sand, mud, slurry, waste, foliage, light snow, standing water, and industrial spillage.
