

New Digital FlexProbe

AEMC®

AEMC® (Foxborough, MA) has introduced the new Digital FlexProbe® Models 400D and 4000D, which can be used for TRMS AC current measurements and are rated at 600V CAT IV. The Model 400D is available with a 6- or 10-inch sensor, has a measurement range starting at 20mA, and is designed for work in residential, commercial, and light industrial applications. The Model 4000D – available with a 14-inch sensor, has a measurement range starting at 100mA, and can be used on higher-power industrial installations, as well as electrical utilities for measurements up to 4000 Amps. Two buttons start the instrument, deactivate the auto power-off, HOLD the value on the display, or store the maximum value. The values are read directly on the built-in 4000-count display.
