

# SuperStar Membrane Dryer

LA-MAN Corporation

### LA-MAN Corporation

(Mazeppa, MN) now offers the AMD-035 SuperStar Membrane Dryer that provides ultra-clean and ultra dry compressed air specifically designed with the automotive industry in mind. This unique membrane dryer can be used where refrigerated dryers may be too large or electricity is not available or desirable. The innovative AMD-035 Membrane Dryer lowers the dew point by continuously removing water vapor and venting into the surrounding atmosphere, explains the company. With dew point temperatures reduced 20 degrees F or more, the AMD 035 SuperStar Membrane Dryer is an ideal solution for spray booth applications. Maintenance on the equipment is easily accomplished with the installation of the appropriate service kit and without removing the unit from the air system.
