

Workstation With Conveyor Solutions

Lista International Corporation

Lista International

Corporation (Holliston, MA) has presented the Arlink 8000 Modular Workstation System with conveyor solutions. Ergonomically designed, these modular workstations offer unlimited flexibility to accommodate changing or future needs, says the company. Ideal for a variety of applications, such as assembly, inspection, testing, rework, packaging, and material transfer, Arlink 8000 workstations can be assembled and reconfigured fast to save time and money. The workstation is available with a supplied conveyor system or is easily integrated with an existing conveyor for cost-effective, high-efficiency workflow management through the entire production stream, the company says. Each Arlink 8000 Modular Workstation can be configured in a variety of heights and lengths to best suit specific needs and are available in five standard widths, and in three heights up to 84 inches.
