

Rotary Cabinet Storage

Spacesaver Industrial

Spacesaver Industrial®

(Fort Atkinson, WI) has introduced its Rotary Cabinet storage, designed to better organize tools, parts, and supplies for maximum space efficiency. Unlike traditional shelving or cabinets, rotary storage provides back-to-back storage compartments that rotate for easy access, the company explains. When not in use, cabinets can be locked in a closed position, delivering protection of high-value parts and supplies from dust, damage, and theft. Spacesaver Industrial also offers a secure TouchPad electronic keypad control and keylock that provides an extra measure of security for high-value items. The rotary durable steel construction is available in twelve tier heights and has the design flexibility to work alone or be customized to meet storage needs. Optional drawers, dividers, shelves, and bins are also available.

Check it out at industrial.spacesaver.com [1].
