

## Walk-Behind Scrubber

Kärcher

The newly designed B 80 W walk-behind scrubber from **Kärcher** (Camas, WA) incorporates a number of improvements that make it easier to use, says the company. The compact, narrow design makes the B 80 easy to maneuver, and its tank's asymmetrical shape gives the operator a clear view of the brush head. During cleaning the brush head, like the suction bar, is lowered automatically. The waste water tank is cleansed by an automatic rinsing system without the operator coming into contact with the contents. With the Kärcher Intelligent Key system, a different profile can be set for each user, ensuring ease of use, according to the company.
