

Filter Compressed Air

LA-MAN ® Corporation

LA-MAN ® Corporation (Mazeppa, MN)

has a unique approach to providing filtration for compressed air systems, says the company: The patented series of Extractor/Dryers®, designed as a point of use filter that efficiently removes moisture and contaminants to improve and extend the life cycle of tools and equipment. The Extractor/Dryer® is a two-stage filter designed to operate most effectively within twenty-five feet of the point of use. Each model offers a standard 5-Micron rating with lower Micron ratings available. With flow ranges of 15 SCFM to 2000 SCFM and pressure ratings of up to 250 PSI, the Extractor/Dryer® is an ideal solution for an extensive array of applications including air powered tools, surface preparation, paint spraying, powder coating, and pneumatic operated equipment.
