Insulated Tool Line

C.H. Hanson

Hand tool company **C.H.**

Hanson (Naperville, IL) has announced that they are launching a full line of 1,000v rated, fully insulated tools designed for the electrical and maintenance professional. They are partnering with UK tool manufacturer Insulated Tools Limited to be the sole North American supplier of ITL's complete line of insulated hand tools to the MRO professional. The tools will be marketed under the C.H. Hanson/ITL brand name. Every tool meets or exceeds International Electrotechnical Commission (IEC) standards IEC60900 and ASTM F1505. ITL tools are the only insulated tools that have achieved the Category "C" rating for use in extreme temperatures, says the company. These products are tested to withstand impact after being subjected to temperatures from -40 to +158 degrees F for two hours.
