

SpinTec™ Drench Shower

Bradley

For emergency situations when every second counts, the SpinTec™ drench shower from **Bradley** (Menomonee Falls, WI) provides a superior washdown in a shorter amount of time than other emergency fixtures, says the company. A built-in flow control makes Bradley's SpinTec as water-efficient as it is effective. Compared to most units with no flow control, the SpinTec uses 66 percent less water. This conserves 150 gallons of water during a 15-minute flush—a significant savings. The compact showerhead also uses 75 percent less material, which is another "green" benefit of this new technology.
